

AIMLSystems 2022

The 2nd International Conference on AI-MLSystems

An Initiative of the COMSNETS Association

October 12-15, 2022

The Chancery Pavilion, Residency Road, Bangalore, India | Hybrid Conference

ORGANISING COMMITTEE

General Co-chairs

- Ralf Herbrich, Hasso Plattner Institute, Germany
- Rajeev Rastogi, Amazon, India
- Dan Roth, University of Pennsylvania, USA

Technical Program Committee Co-chairs

- Sumohana S. Channappayya, IIT Hyderabad, India
- Srjana Merugu, Amazon, India
- Manuel Roveri, Politecnico di Milano, Italy

Industry Track Co-chairs

- Atul Batra, Manthan Systems, India
- Ed Banti, Uber, USA
- Milind Gandhi, Machine Intelligence and Robotics CoE (MINRO), IIIT Bangalore, India

Panel Co-chairs

- Gaurav Aggarwal, Google Research India
- Dhruv Mahajan, Meta, USA
- Eno Thereska, Alcon.ai, UK
- Janardhan Rao Doppa, Washington State University, USA

Demo Co-chairs

- Aditya Karnik, Gojek, India
- Shobhit Niranjan, Amazon, India
- Alessya Labzhinova Visnjic, WhyLabs, USA

Tutorials Co-chairs

- Manish Gupta, Microsoft, India
- Rishita Anubhai, AWS, India
- Gabriella Pasi, University of Milano-Bicocca, Italy

Doctoral Symposium Co-chairs

- Sourangshu Bhattacharya, IIT Kharagpur, India
- Nikhil Rasiwasia, Meta, UK
- Serene Banerjee, Ericsson Research, India

Virtual Platform Co-chairs

- Ananda Krishna, Astra Security, India
- Raj Sharma, Walmart Global Tech, India

Web Co-chairs

- Utkalika Satapathy, IIT Kharagpur, India
- Meenu Dey, IIT Guwahati, India

Publicity Co-chairs

- Abhijit Mondal, VDX.TV, India
- Radhika Kannan, Intuit, India
- Diana Henry, Amazon, India

Social Media Co-chairs

- Sourav Bansal, IIT Delhi, India
- Manav Bansal, IIT Delhi, India

Sponsorship Co-chairs

- Giridhar Mandyam, Qualcomm, USA
- Rajeev Shorey, UQIDAR, IIT Delhi, India

Steering Committee

- Uday Desai, IIT Hyderabad, India
- Anurag Kumar, IISc, India
- Giridhar Mandyam, Qualcomm, USA
- Huzur Saran, IIT Delhi, India
- Rajeev Shorey, UQIDAR, IIT Delhi, India
- G. Venkatesh, SASKEN, India

CALL FOR PARTICIPATION

AIMLSystems is a new conference targeting research at the intersection of AI/ML techniques and systems engineering. Through this conference we plan to bring out and highlight the natural connections between these two fields and their application to socio-economic systems. Specifically we explore how immense strides in AI/ML techniques are made possible through computational systems research (e.g., improvements in CPU/GPU architectures, data-intensive infrastructure, and communications), how the use of AI/ML can help in the continuous and workload-driven design space exploration of computational systems (e.g., self-tuning databases, learning compiler optimisers, and learnable network systems), and the use of AI/ML in the design of socio-economic systems such as public healthcare, and security. The goal is to bring together these diverse communities and elicit connections between them.

Contributions are invited under Research, Industry & Applications, and Demonstration Tracks of the conference. Authors are encouraged to submit previously unpublished research at the intersection of computational / socio-economic systems and AI/ML.

TOPICS OF INTEREST

1. Systems for AI/ML:

- CPU/GPU architectures for AI/ML
- Specialised/Embedded hardware for AI/ML workloads
- Data intensive systems for efficient and distributed training
- Challenges in production deployment of ML systems
- ML programming models, languages, and abstractions
- ML compilers and runtime
- Efficient systems for data preparation and processing
- Systems for visualisation of data, models, and predictions
- Testing, debugging, and monitoring of ML applications
- Cloud-computing for machine and deep learning
- Machine and deep learning “as-a-service”
- Efficient model training, optimisation and inference
- Tiny Machine Learning
- Embedded and Edge Artificial Intelligence
- Distributed and parallel learning algorithms
- MLOps (data collection, monitoring and re-training)

2. AI/ML for Systems:

- AI/ML for VLSI and architecture design
- AI/ML in compiler optimisation
- AI/ML in data management - including database optimisations, virtualisation, etc.
- AI/ML for networks - design of networks, load modelling, etc.
- AI/ML for power management - green computing, power models, etc.
- AI/ML for Cloud Computing; AI/ML for IOT networks

3. AI/ML for Socio-Economic Systems Design:

- Computational design and analysis of socio-economic systems
- Fair and bias-free systems for social welfare, business platforms
- Applications of AI/ML in the design, short-/long-term analysis of cyber-physical systems
- Mechanism design for socio-economic systems
- Fairness, interpretability and explainability for ML applications
- Privacy and security in AI/ML systems
- Sustainability in AI/ML systems
- Ethics in AI/ML systems
- Applications of AI/ML in financial systems

CONFERENCE HIGHLIGHTS

- Keynote/Invited Talks
- Technical Paper Sessions
- Industry Track Session
- Panel Discussions
- Demos & Exhibits
- Doctoral Symposium
- Tutorials

KEYNOTE SPEAKERS

Carlos Guestrin
Stanford University, USA

Nikko Strom
Amazon, USA

Cynthia Rudin
Duke University, USA

Partha Pratim Talukdar
IISc Bangalore & Google Research,

Max Welling
University of Amsterdam & Microsoft Research, Netherlands

Sunita Sarawagi
IIT Bombay, India

Thorsten Joachims
Cornell University, USA
